# 1 Introdução

---

Este documento tem como objetivo explicar todo o processo de configuração do acesso à rede *wireless* EDUROAM em ambiente Windows 8.

- Insira os valores: **Network name:** *eduroam*; **Security type:** *WPA2-Enterprise*; **Encryption type:** *aes*

Manually connect to a wireless network

Enter information for the wireless network that you want to add

Network name:

Security type:

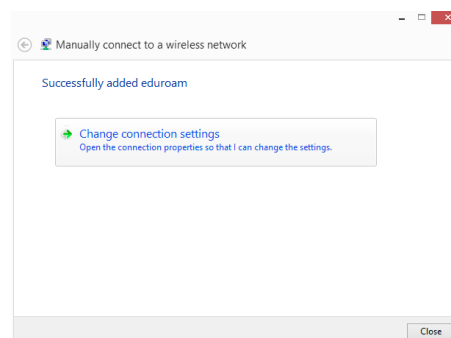

Encryption type:

Security Key:   Hide characters

Start this connection automatically  
 Connect even if the network is not broadcasting  
Warning: If you select this option, your computer's privacy might be at risk.

Next Cancel

- Carregue em **Change Connection Settings**

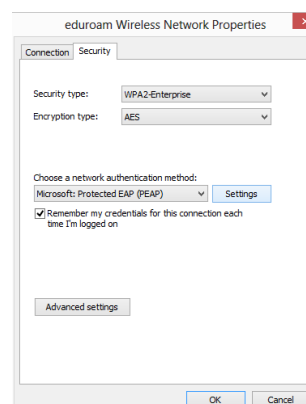

Manually connect to a wireless network

Successfully added eduroam

[Change connection settings](#)  
Open the connection properties so that I can change the settings.

Close

- Carregue em **Settings**

eduroam Wireless Network Properties

Connection Security

Security type:

Encryption type:

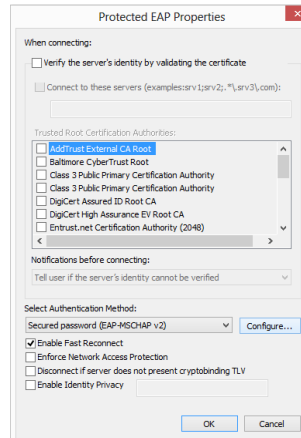

Choose a network authentication method:  
 Settings

Remember my credentials for this connection each time I'm logged on

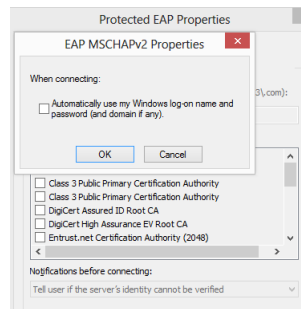

Advanced settings

OK Cancel

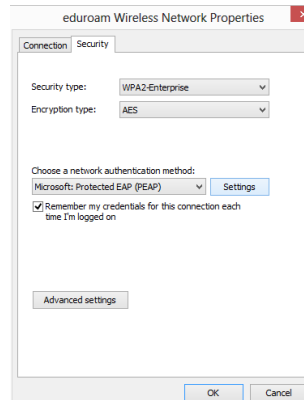

- Verifique as configurações e carregue em **Configure**

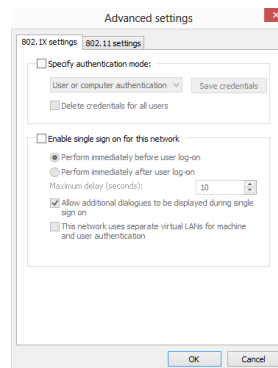

- Verifique se o campo **Automatically use my Windows logon name and password (and domain if any)** está desseleccionado.

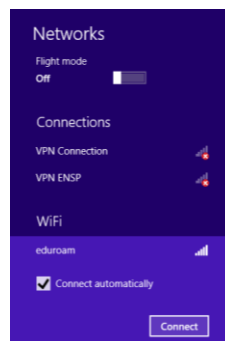

- Volte ao ecrã anterior e carregue em **Advanced Settings**

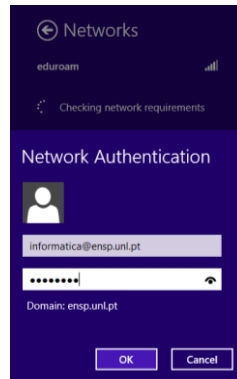

- Verifique as configurações

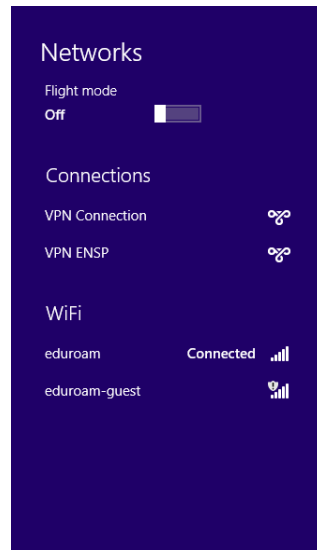

- Faça OK e feche todos os ecrãs
- Carregue no network icon na toolbar para ter acesso às networks

- Insira o utilizador e password (o utilizador e password é igual ao seu endereço de e-mail; exemplo: `informatica@ensp.unl.pt`)

- A Eduroam deverá ficar no estado **Connected**

- Execute o browser e verifique se consegue aceder a alguma página internet. Se sim, a configuração está concluída.
